Religion Project

Lent starts on Ash Wednesday 17th February and continues for 6 weeks until Holy Week. During these 40 days (or until school reopens fully) see if you can find out as much as you can about some of the following and create a project book/folder to bring back to present to your teacher & classmates.

Mardi Gras / Shrove Tuesday

Ash Wednesday

St. David (1st March)

Passion Plays

Stations of the Cross

Mothering Sunday

St. Patrick (17th March)

St. Joseph (19th March)

St. Oscar Romero (24th March)

Feast of the Annunciation (25th March)

Palm Sunday

The Easter Triduum

Easter food – hot cross buns, Simnel cake, eggs

Easter Traditions around the World

Projects – put 100% effort in and present your work neatly and creatively!

'Rivers' Project

Design an eye-catching front cover for your project then research Rivers, finding out as much as you can about the following:

1. Where does our water come from? The Water Cycle
2. Where are the world's rivers?
3. How do rivers shape the land?
4. What landforms do rivers create?
5. Why are rivers important to people?
6. What happens when a river floods?

There is a 'Rivers' unit in KS2 Geography on the Oak National Academy and information on the BBC too.

Create a 'Water Cycle Craft' using any craft materials and resources you can find at home.

Make a 'Model of the river system' including labelled features.

Research the River Mersey and produce a poster – how long is it? Where is its mouth and source? Where does it flow through? Can you produce a landscape drawing/painting of it? Now choose a world river to present the same information about.

'Climate Change' Project

Research Climate Change and create an exciting project including:

- A front cover
- What is global warming?
- What is climate change?
- Why is recycling important?
- Plastic pollution
- Endangered species
- Sustainability
- Renewable energy

Lessons are available on the Oak Academy for these 3.

Junk Modelling – can you save things from being thrown out and turn them into something new? You could build a robot, vehicle etc. How creative can you be?

Bottle top collage – can you create a picture out of collected bottle tops?

Make a **rain gauge** to measure rainfall – can you think of a way to recycle this water?

Design a Sustainable House (built to have a limited impact on the environment) – think about: insulation, energy sources, recycled materials, carbon footprint, roofing, doors and windows, heating

Grow your own – could you start to grow your own herbs/vegetables?

Lots of information can be found on the BBC Teach website. You can also access the Blue Planet Live Lesson!

Bring your project back to school with you when we can safely return. **We can't wait to see them!**
