

Class 11

To celebrate World Book Day, we each designed a piece of bunting with clues about our favourite book. We were then tasked with identifying our classmates' favourite books by looking at their clues. We also took part in a very competitive Kahoot quiz!

We were visited by Greater Manchester Fire Service to ensure that we know how to stay safe at home. We learnt and practised the process of 'stop, drop and roll' while also learning that we should have smoke detectors on all floors of our homes.

On STEM day, we dressed up in a maths or science themed outfits. We consolidated some of our Maths learning by playing a range of games.

Additionally, on STEM day we also conducted a practical science investigation in which we aimed to answer the question, 'At which temperature does yeast grow best?' We created a hypothesis before designing and then performing the investigation.
