

## Class 12

Greater Manchester Fire Service visited Year 6 to ensure that we know how to stay safe at home. We learnt and practised the process of 'stop, drop and roll' while also learning that we should have smoke detectors on all floors of our homes. Can you guess who was dressed up as a firefighter?

To celebrate World Book Day, we each made a poster about our favourite author. We also brought into school our favourite book (by our favourite author) and we each told the class why we had chosen that particular book and read an extract out loud to them. We also entered the National Book Token competition.

On STEM day, we dressed up in a maths or science themed outfits. We consolidated some of our Science learning by researching about 'Connections' in the scientific world looking particularly at Food Chains and Food Webs

Also, on STEM day we were very lucky to be taught Maths and conduct an investigation with Professor Einstein himself!
