

Class 7

We celebrated STEM Day by conducting a Science experiment that linked with our learning in Geography and PSHE: To investigate which material would be the most effective as a water filter. We tested rocks, a tea towel, coffee filters and cotton wool!

STEM DAY: In class 7 we played lots of interactive maths games. We used our mental maths skills as well as our problem solving skills. We competed against each other and worked in teams for some too.

We performed our class assembly all about Self-discipline and the importance of Lent. We worked really hard on our lines, drama and singing. We were so happy to see so many parents come to watch us too! Thank you =)

In PE we have been working really hard on our cricket skills with Mr Neilson. In particular, we have been working on bowling and batting skills.
