

Class 9

As part of our Partnership Primary Program, Class 9 attended a workshop at St. Peter's RC High School which allowed them to use comics and graphic novels to develop narrative writing skills.

For STEM Day, Class 9 created a maths comic strip composed entirely of polygons. We then used iMovie to create a trailer for our comic strips.

As part of British Science Week, Class 9 looked at how forces impact the construction of bridges. We then designed and constructed our own bridges to carry that would support a heavy load.

In Science this half-term, Class 9 completed the topic, *Living Things and their Habitats*. We looked at the features of eggs as part of our discussion on the life cycle of birds.
