

Class 10

As part of our Partnership Primary Programme, Class 10 attended a workshop at St. Peter's RC High School, which allowed us to use comics and graphic novels to develop narrative writing skills.

For STEM Day, Class 10 created a maths comic strip composed entirely of polygons. We then used iMovie to create a trailer for our comic strips.

As part of British Science Week, Class 10 looked at how forces impact the construction of bridges. We then designed and constructed our own bridges that would support a heavy load.

In Science this half-term, we started the preparation work to grow our own potatoes in our school garden. Step one was to prepare our potatoes by chitting them.
