

Class 13

In **geography** lessons, we have been learning **orienteering** skills. We have completed a range of 9, 18 and 36 cone **orienteering & maths** tasks outdoors, which was lots of fun.

As part of our **art** topic 'People in Action', we made **clay sculptures** depicting a sporting activity. We learned and applied the technique of '**slip, score and blend**'.

In our **PSHE** lessons, we discussed the **diversity** within our own class and created a display to celebrate our different backgrounds and cultures. We are a very **multicultural** class which is fantastic!

Here we are holding up our **wire sculptures** of 'People in Action' (art project). We used a range of finishing techniques so they each look very unique.
