

Class 5

During Science this term we have been learning about friction. We enjoyed experimenting with different surfaces to see which material created the most friction.

To celebrate the King's Coronation, we played coronation bingo in French, drew St Edward's crown, made our own jewelled crowns and created a time capsule! We had so much fun!

The spring weather is finally being kind to us as we take part in Tennis for our P.E. We have been perfecting our skills by practising how to serve and bat properly.

We have been learning all about First Aid in our Relationships Education. We had to act out different scenarios (we love drama!) to show how we would react quickly whilst staying calm
