

Class 13

We learned how to use watercolours in our art lessons, and created these fantastic scenes of Dunkirk beach (linked to our WW11 topic).

In science, during our 'Evolution and Inheritance' topic, we created our own unique creatures with specific adaptive traits to help them survive in their environment.

In geography, we learned all about rivers and their features, and we went to Quarry Bank to explore the River Bollin. It was a fantastic field trip!

In religion lessons, we explored the meaning of unconditional love and how we can show love to others in our classroom, on the playground, at home and in our communities.
