

Class 2

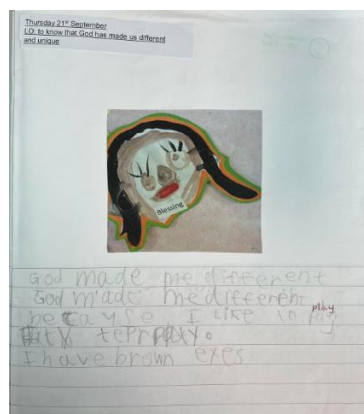

In our math lessons we have started looking at the part whole model. Children have been using counters to make parts to figure out number bonds from 1-10.

In our Literacy lessons, we have been reading The Gruffalo and the children have been writing excellent descriptive sentences using adjectives!

We have been looking at moving pictures in our D&T lessons and the children have had the opportunity to create their own moving pictures with sliders.

In our RE lessons, we have created self portraits to show how unique we all are and wrote all the different reasons we are different and unique.
