

## Class 9

In class 9 we completed a design and technology project with Amanda Morrow. We designed, made and evaluated a maths buzzer game! It was a noisy process!

An extremely proud moment for class 9 was performing Hamlet at the Contact theatre. We 'blew away' the audience with our acting skills. We also had our own dressing rooms backstage which you can see us in above.

In Science, we have been learning all about properties of materials. We have done lots of investigations. In one of them we investigated soluble and insoluble materials.

In religion lessons we looked at the marriage ceremony and the significance of rings. We outlined the main parts of the ceremony working in groups.
