

Class 11

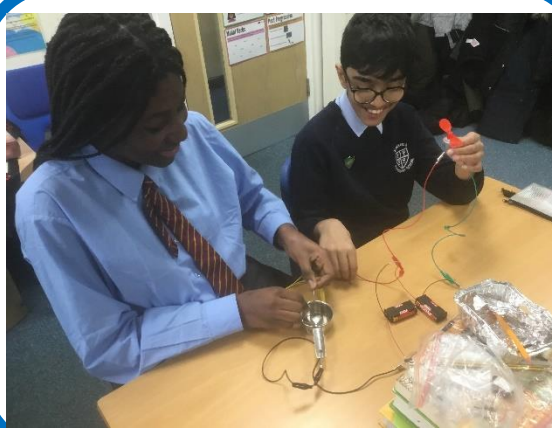

To finish off our learning all about the circulatory system, we dissected a lamb's heart to explore the four chambers. We were also able to identify the aorta, pulmonary veins and valves.

Our Art topic this half-term was tie-dye and we learnt about Hugo Pineda. We practised different tie-dye methods with wet wipes before exploring resists using natural dyes. Our final task was to produce a tie-dyed t-shirt.

We were presented with a very exciting opportunity: a live P.E. lesson with Joe Wicks! We travelled into Manchester and after a live workout, we had a Q&A session with Joe himself before completing some wellbeing activities.

Our science topic this half-term was Electricity during which we: investigated conductors and insulators within circuits; learnt how to draw circuit diagrams using circuit symbols; compared the variation in how components function.
