

## Class 12

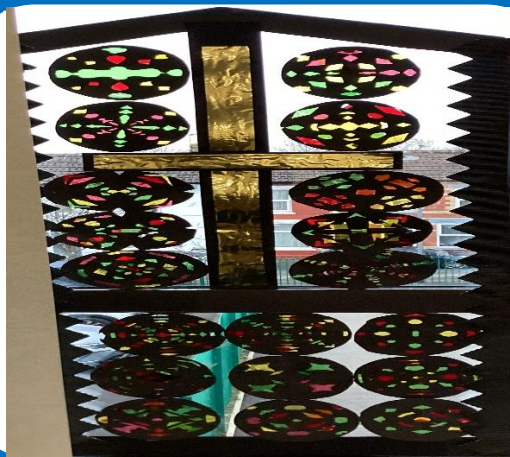

This half term in art we experimented with different methods of tie-dye. We explored the history of dying fabrics using natural and man-made dyes. We even made our own t-shirts!

In our ICT lessons we have been working with Miss Copley to create our own websites using our knowledge of World War 2.

In Science, we dissected a lamb's heart and learnt all about how the blood circulates around its body. We used blue straws to replicate deoxygenated blood and red for oxygenated blood.

During our Caritas afternoon this term, we discussed how we can work together to achieve our goals and aim high. We created a stained-glass window, showing that we are all fellow workers of God.
