

Class 7

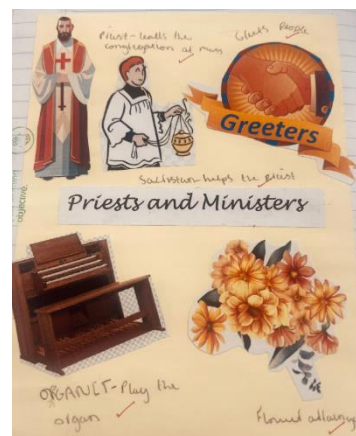

In DT, class 7 worked with Amanda to create steady hand games. This linked perfectly with our science topic of electricity too! We learnt the key words 'conductor' and 'insulator' and created our very own steady hand games designing the entire concepts of our games ourselves!

In History, we have been learning all about the Maya Civilisation. This included learning about where the Maya's lived, the religious practises and also linking this to Art by looking at Frederick Catherwood's artwork depicting the Maya civilisation.

To celebrate Chinese New Year and with 2024 being the year of the wood dragon, we created our very own dragon masks!

In RE, we have been learning all about 'community' and how communities help people. We created a collage showing how the priest, sacristan and people share the Good News within the parish community, just as the apostles did in the early church.
