

Class 8

In Science, we have been learning about 'conductors' and 'insulators'. We sorted a range of materials and tested whether they were conductors or insulators.

We linked our learning about electricity in Science to our DT project to make a steady hand game with a working circuit.

In History, we have been learning about the Maya civilisation. We learned about the types of masks and headdresses that the Maya wore and made our own!

Our focus for Caritas in Action was 'The Dignity of Work'. We focussed on what it means to be a part of a community and made a lock and key to represent teamwork as one does not work without the other.
