

Class 11

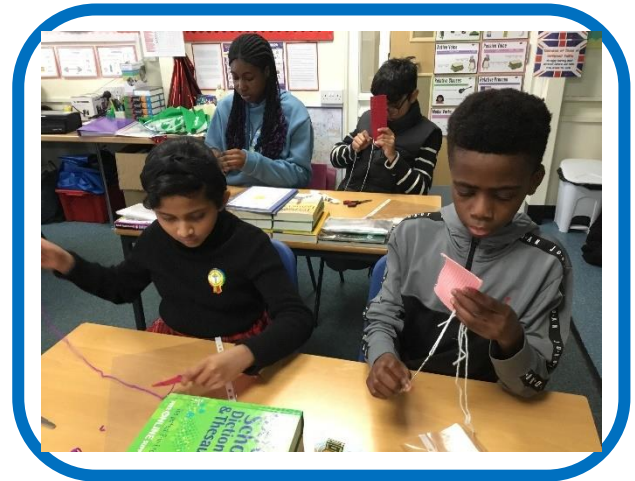

In Science, we have been learning all about Light. We planned and filmed a short 'live lesson' explaining how we see objects and how light is reflected. We also investigated how the type of material affects the shadow that is created.

For our CARITAS in Action afternoon this half-term, our focus was Solidarity and the Common Good. We explored what this phrase meant before deciding upon how we can work together in solidarity, each choosing something to contribute as our piece of the jigsaw.

During this half term, we celebrated World Book Day. We each dressed up as a character from a book, entered a poster competition about our favourite author and then designed a scene from a book in a shoe box. What a wonderful day we had!

Our Design and Technology project has been linked to our Geography topic and based upon the Amazon Rainforest. We have designed and made our very own poison dart frog bean bag, but before we began, we needed to practise different types of stitches.
