

## Class 12

When the sun made an appearance, we went outside for our maths lesson. SAT's style questions were pinned all around the playground for us to practice.

For science we are learning about light and how it travels in straight lines. We took some wool to show how light travels from the source to the object, to our eyes.

Pupils are making an effort this term to improve their writing further. Here are two children proudly showing their fantastic examples of writing in Class 12.

It was World Book day and the whole school had so much fun dressing up. In Class 12 we completed book related activities all day.
