

Class 11

Our Art topic this half-term is Sculpture, looking at people in action. To begin with, we each worked in partners to take up sporting positions and to create a series of still photos showing the sequence of movement.

This half-term, we also took our SATs. In the lead up, we completed outdoor trails, arithmetic relays and also enjoyed marking Mrs Fosbrook's attempts in which she made **lots** of errors for us to identify and correct.

During our Computing lessons, we have been practising programming Microbits using block code editing. We explored algorithms and used the emulator to test the results. We also downloaded programs on to the Microbit to play with others.

As a school, we celebrated the World Day for Cultural Diversity. We dressed in traditional dress or in colours of the flags linked to our heritage as well as finding out more about our different cultures and presenting to our peers.
