

Class 3

As part of our Geography Field Work, Class 3 went on a trip to Lyme Park. We walked up to the cage, visited the playground and toured the amazing Lyme Hall.

We have been learning about Plants in Science. In one of our lessons, we dissected some bedding plants to find the different parts and discuss their function.

In a Science lesson, we looked at a variety of different plants and completed some detailed observational drawings.

On Tuesday 21st May, we celebrated Cultural Diversity Day. Class 3 loved wearing traditional clothes and discussing their family heritage.
