

## Class 5

In science we used paper clips to test the strength of different magnets and recorded the results in our books.

We took part in a spectacular science workshop with Amanda Morrow using the knowledge we have learnt about in our forces topic.

During the workshop with Amanda, we designed and made our own magnetic maze game containing a moving mechanism.

To celebrate UN Cultural Diversity Day we all dressed up in traditional dress from all of the amazing countries that our families are from and taught each other about the countries.
