

Class 7

This half term, we have been learning all about money in maths. To end the unit, we played a game which involved us calculating money using addition and subtraction. The person with the most amount of money won!

To celebrate UN Cultural Diversity Day, we dressed up in the colours of our flag or cultural costumes and researched all about our special country!

During our caritas in action work, we looked at our rights and responsibilities as humans. We identified the different rights that we have as children as well as what we are responsible for.

To begin our fable writing, we looked at different fables and chose one to act out in groups. This brought to life what the moral of a fable is and helped us to understand the feelings of characters.
