

Class 7

This half term, Amanda came to visit us and we learnt the basics of threading a needle, creating a running stitch and eventually creating our very own drawstring bags.

In Science, we have been learning all about States of Matter. We conducted an experiment where we had cool water, warm water and boiling water. We discovered that the boiling water melted the chocolate the fastest.

In writing, we have been learning all about persuasive techniques. We created our very own chocolate bar to persuade Willy Wonka to have it at his factory.

For Sports Day, we visited Belle Vue Basketball Hall and participated in different sports including javelin, long jump, hoops and relay. We enjoyed it very much and had a great time!
