

Class 9

During our Carbon Education lessons we have been working on group projects to help reduce our carbon emissions at St Richard's. In one of group, we designed some low carbon meals, and the kitchen staff agreed to put it on the menu. It was delicious!

In class 9 we visited St Peter's High School for a year 5 transition day. We were split into groups and took part in drama, music, Science and History lessons.

We were extremely lucky to meet the author Guy Bass. He visited our classes and signed his latest book. He also made us laugh from start to finish in an assembly all about himself and his books.

During our geography lessons we worked in groups to teach each other about different mountain types. We created actions, movements and raps to teach the rest of the class how each mountain type is formed.
