

## Class 13

We learned how to use watercolours in our art lessons and created these fantastic scenes of Dunkirk beach (linked to our WW1 topic).

In science, during our 'Evolution and Inheritance' topic, we explored a range of fossils and placed them on a 'Tree of Life' board. We also learned all about animal adaptations.

In geography, we learned all about rivers and their features. We went to Quarry Bank to explore the River Bollin. It was a fantastic field trip!

In pairs, we created models of the river system including all the features found in the upper, middle and lower course.
