

Class 7

This half term, Tony North came to visit us! He taught us all about Roman soldiers and their gear. We then created our very own gladius as well as creating Roman and Celtic artefacts using gold and silver foil.

On the 3rd of October 2024, Class 7 celebrated 'World Poetry Day'. This year's theme was 'counting', and we explored the poem 'one'. We then created and performed our own version of this poem!

In RE, we answered the big question "how can we build up our community? We created our own self-portraits to show a sense of belonging and created our own acrostic poems to show how we build up our community.

In Science, we conducted an experiment to test which liquid causes the most tooth decay. We used hard-boiled eggs as they resemble teeth the best. We found that orange juice caused the most damage to the shell due to the acidity.
