

Class 10

In our RE work we explored the idea of waiting purposefully in hope during Advent. We created cubes that contained the 'hidden meaning' of this special time.

We created our own Jesse Tree as part of our Christmas preparations, exploring stories from the Old Testament, leading up to the birth of Jesus.

In our Art lessons we continued our sculpture work, based on The Iron Man by Ted Hughes. We also built large-scale robots out of scrap materials.

We took a class trip to St. Peter's to enjoy a science workshop presented by a chemist from Manchester University. There were lots of pops, bangs and explosions!
