

Class 12

In Science, we dissected a lamb's heart. We looked at all the vessels going in and out of the top and traced how the blood goes through the heart taking oxygen and other nutrients around the body.

Our DT topic was very exciting as Amanda came in and we designed and created a vehicle for a younger child using our knowledge of pulleys and levers. Making the circuit was the most interesting part.

On Friday's the children in Class 12 love to take turns in leading our celebration of the word. We gather, listen to a piece of scripture and reflect. This week we thought about the needs of others.

In our science topic this term we have been learning about the circulatory system, how the heart works and which muscles are used during different exercises.
