

Class 3

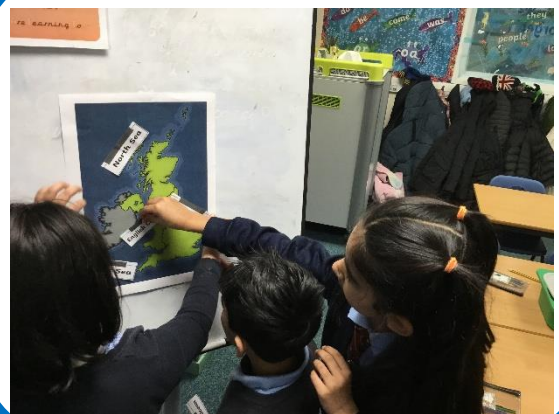

In maths lessons, we have been exploring 2D and 3D shapes which has involved identifying the properties of shapes such as the number of sides, vertices and faces each shape has.

To commemorate Remembrance Day, we decorated biscuits by drawing poppies on top and held a 2-minute silence to remember and pray for those who sadly passed away fighting for our country.

One of our science lessons this half term involved us becoming explorers by visiting Father Dever's garden to hunt for minibeasts that may live in the microhabitats there. We found a lot of snails and ants!

In our topic of the UK, we have learned all about the four countries that make up our island and discovered the seas and oceans that surround it. This has helped us write non-chronological reports in our English lessons too!
