

## Class 6

Class 6 had a special visitor! They became earth explorers and learned about volcanos and earthquakes including some key sites around the world and what its like to be in an earthquake.

We learned about our responsibility to care for God's creation, exploring the term 'stewardship'. Children created recycled art models of key environmental issues.

In Art, we explored Yayoi Kasuma's obliteration room, looking at her use of spots to create art. We made lots of different art pieces inspired by Yayoi, including geometric nets made into 3D spotty shapes

We also created clay structures inspired László Moholy-Nagy spiral structures. Class 6 rolled out the clay, and printed designs using tools and shapes inspired by him.
